

Tropical Storm Erika Update No. 1

You are receiving this email because you have expressed an interest or are the designated flood control/drainage entity.

The District wishes to inform all property managers and drainage committee members of the National Hurricane Center's weather outlook for Tropical Storm Erika issued today, August 25, 2015 at 11:00am.

The National Hurricane Center www.nhc.noaa.gov is issuing advisories on Tropical Storm Erika, located near latitude 15.2 North, longitude 51.0 West. Erika is moving toward the west near 20 mph (31 km/h), and a west-northwestward motion at a slightly slower forward speed is expected over the next 48 hours. On the forecast track, the center of Erika will be near the Leeward Islands Wednesday night and early Thursday.

Although it is too early to reliably predict the storm's development and potential impact on our area, the District encourages all communities to inspect their drainage facilities and perform any necessary flood protection maintenance. Please do not hesitate to contact the District if you have any questions.

Thank you,

Lake Worth Drainage District
