

Note to File: Delaire Country Club

The canal rehabilitation: L-38 Canal adjacent to the south side of Delaire Country Club is being during the time that the Delaire golf course is under renovations to limit the distractions to golf course operations. This project is being coordinated with the golf course maintenance group. There are no plans at this time for LWDD to do any work on the portion of the LWDD E-4 Canal which is the canal that is running north/south adjacent to the east side of Delaire Country Club.

LWDD L-37 Canal (adjacent to the north side of Delaire), LWDD is planning to work on the portions adjacent to the golf course at this time to again take advantage of the time the golf course is being renovated. However, before canal rehabilitation work will begin on any portions of the LWDD L-37 Canal adjacent to individual home parcels, notification letters will be distributed to corresponding property owners.
