CHURCH OF JESUS CHRIST OF LATTER DAY SAINTS / TAX DIVISION C/O
50 E NORTH TEMPLE ST FL 22
SALT LAKE CITY UT 84150 0022

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-26 Canal from Knuth Road to Congress Avenue (Project No. 17-8889P.06; Job No. 099B)

Site Address: 1480 KNUTH RD BOYNTON BEACH 33436

Dear CHURCH OF JESUS CHRIST OF LATTER DAY SAINTS / TAX DIVISION C/O:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-26 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Joseph Walsh, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5588.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first letters of each word being capitalized and prominent.

Site Address: 136 TARA LAKES DR W BOYNTON BEACH 33436

Dear TONES JEAN & MARIE S. GUSTIN:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-26 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Joseph Walsh, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5588.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. Dear JOLANTA A. NOWAKOWSKA & ANDRZEJ PALUCHA:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-26 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. JOEL MASSILLON
33 PEACHTREE PL
BOYNTON BEACH FL 33436 6765

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-26 Canal from Knuth Road to Congress Avenue (Project No. 17-8889P.06; Job No. 099B)

Site Address: 33 PEACHTREE PL BOYNTON BEACH 33436

Dear JOEL MASSILLON :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-26 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Dear NELMARTA ASSOCIATES LTD & IBANEZ EDGAR &:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-26 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-26 Canal from Knuth Road to Congress Avenue (Project No. 17-8889P.06; Job No. 099B)

Site Address: 2605 W WOOLBRIGHT RD BOYNTON BEACH 33463

Dear 7 ELEVEN INC :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-26 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-26 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of March 12, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.
