WELLINGTON FL 33449 8352

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 3574 KEWANEE RD LAKE WORTH FL 33462

Dear PINNACLE LOOKING GLASS LLC :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Vickie Demerski, Executive Assistant, at 561-498-5363, extension 5585.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

ALLY OLSSON & ALLY OLSSON TR.
2920 NORWAY PINE LN
LAKE WORTH FL 33462 6406

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 2920 NORWAY PINE LN LAKE WORTH FL 33462

Dear ALLY OLSSON & ALLY OLSSON TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Vickie Demerski, Executive Assistant, at 561-498-5363, extension 5585.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

JOHN F. & SARAH B. MAIN
6538 RIGGERS RD
LAKE WORTH FL 33462 3642

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 6538 RIGGER RD LAKE WORTH FL 33462

Dear JOHN F. & SARAH B. MAIN:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. Dear NATACHA ROMUS & DIEUSEUL BERTRAND:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

JOHN R. & KATHLEEN REDON
3329 PARADE PL
LAKE WORTH FL 33462 3682

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 3329 PARADE PL LAKE WORTH FL 33462

Dear JOHN R. & KATHLEEN REDON:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

DAMON CAPOZIO
3170 BUCCANEER RD
LAKE WORTH FL 33462 3735

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 3163 BUCCANEER RD LAKE WORTH FL 33462

Dear DAMON CAPOZIO :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Dear JOHN M. PETROFSKY :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

YASEMIN NALBANT
2969 NORTHSIDE DR
LAKE WORTH FL 33462 3887

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 2969 NORTHSIDE DR LAKE WORTH FL 33462

Dear YASEMIN NALBANT :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Dear CLAY T. & REGINA MCPOYLE:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. JAMES R. HARRISON
2843 NORTHSIDE DR
LAKE WORTH FL 33462 3845

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-17 Canal from Approx. 2700 Feet West of Congress Avenue to Congress Avenue and from Congress Avenue to Lake Osborne (Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B)

Site Address: 2843 NORTHSIDE DR LAKE WORTH FL 33462

Dear JAMES R. HARRISON :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of April 2, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early June 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net.
