2104 CAHUENGA PARTNERS LP & 1520 VISTA PARTNERS LLC
95 N COUNTY RD
PALM BEACH FL 33480 4029

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-2 Canal from the E-2 Canal to Approx. 650 Feet West of Skees Road and from Skees Road to Florida's Turnpike (Project Nos. 16-9933P.02 and 16-9933P.03; Job Nos. 004 and 005)

Site Address: 1501 MEATHE DR

Dear 2104 CAHUENGA PARTNERS LP & 1520 VISTA PARTNERS LLC:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-2 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-2 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of May 7, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early July 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Vickie Demerski, Executive Assistant, at 561-498-5363, extension 5585.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first name being the most prominent.

Site Address: 6839 IMPERIAL DR

Dear AARON & MITCHEL SINUTKO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-2 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-2 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of May 7, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early July 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Subject: INITIAL NOTIFICATION - Rehabilitation of the L-2 Canal from the E-2 Canal to Approx. 650 Feet West of Skees Road and from Skees Road to Florida's Turnpike (Project Nos. 16-9933P.02 and 16-9933P.03; Job Nos. 004 and 005)

Site Address:

Dear ST. ANDREWS PALM BEACH MASTER ASSOCIATION, INC.
ATTN. DON CARSTENS:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-2 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-2 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of May 7, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early July 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. Subject: INITIAL NOTIFICATION - Rehabilitation of the L-2 Canal from the E-2 Canal to Approx. 650 Feet West of Skees Road and from Skees Road to Florida's Turnpike (Project Nos. 16-9933P.02 and 16-9933P.03; Job Nos. 004 and 005)

Site Address: 1495 GOLDEN LAKES BLVD

Dear GOLDEN LAKES HOMEOWNERS ASSN :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-2 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

In order to identify the boundaries of the District's L-2 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of May 7, 2018. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are considered to be encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early July 2018. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view a short (approximately four minute) video regarding the District's Canal Rehabilitation Program please go to the following link: <https://youtu.be/WX64Dp1BRaU>. For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Vickie Demerski, Executive Assistant, at 561-498-5363, extension 5585.

Sincerely,
