DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1400 SW 9TH AVE BOCA RATON FL 33486 5488

Dear MILES G. SIMONS & SONJA REIMANN:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

Dear MICHAEL JEDRZEJEWSKI & SANDRA GOCKE:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1180 SW 14TH ST BOCA RATON FL 33486 5428

Dear 943 HYACINTH DRIVE LLC :

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

Site Address: 1018 SW 14TH ST BOCA RATON FL 33486 5489

Dear KIRK & EVELYN KYLE:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

DAVID L. & COLLEEN B. TAYLOR
1246 SW 14TH ST
BOCA RATON FL 33486 5302

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1246 SW 14TH ST BOCA RATON FL 33486 5302

Dear DAVID L. & COLLEEN B. TAYLOR:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

BOCA RATON FL 33486 5303

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1366 SW 14TH ST BOCA RATON FL 33486 5303

Dear JOYCE A. & SUSAN M. BRENNAN:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1492 SW 14TH ST BOCA RATON FL 33486 5304

Dear FORREST W. & MIRIAM J. BUSMAN:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Dear ROBERT A. & SANDRA S. FALCON:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 780 SW ELM TREE LN BOCA RATON FL 33486

Dear MARK & MARGARET EMPSALL:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

KEVIN VANMIDDLESWORTH
940 SW 14TH DR
BOCA RATON FL 33486 6802

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 940 SW 14TH DR BOCA RATON FL 33486 6802

Dear KEVIN VANMIDDLESWORTH :

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

Dear KURT & SUZANNE M. YOUNKER:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

SERRALUNGA LLC
1060 SW 14TH DR
BOCA RATON FL 33486 6804

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: BOCA RATON FL 33486 6804

Dear SERRALUNGA LLC :

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1160 SW 14TH DR BOCA RATON FL 33486 6771

Dear EVERETT & SHARON A. JOHNSON:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Dear LINDA K. WHITE :

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

WILLIAM J. & CHERYL M. DAWSON
1400 SW 14TH DR
BOCA RATON FL 33486 6502

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1400 SW 14TH DR BOCA RATON FL 33486 6502

Dear WILLIAM J. & CHERYL M. DAWSON:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

RYAN ABOUD & DANIELLE A. RIGGIN
1560 SW 14TH DR
BOCA RATON FL 33486 6505

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: FOLLOW-UP NOTIFICATION - Rehabilitation of the L-50 Canal
from the CSX Railroad to +/-150 Feet East of Southwest 8th Street
(Project No. 16-9763P.04; Job No. A196)**

Site Address: 1560 SW 14TH DR BOCA RATON FL 33486 6505

Dear RYAN ABOUD & DANIELLE A. RIGGIN:

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.

Site Address:

Dear MIZNER FOREST HOA INC :

At its July 11, 2018 Board Meeting, the Lake Worth Drainage District (District) Board of Supervisors agreed to temporarily postpone vegetation removal along the L-48, L-49 and L-50 Canal rights-of-way within the City of Boca Raton (City), providing an opportunity for District and City staff to discuss options for canal rehabilitation and maintenance within the City.

Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. Since that time, the District evaluated and confirmed its ownership and easements on the L-50 Canal and determined that there are no right-of-way ownership discrepancies which might impact removal of nuisance/non-native vegetation or encroachments from the District's right-of-way on the L-50 Canal. Following discussions with City staff, the District has agreed that native trees may remain on the L-50 Canal right-of-way, including Slash Pine, Live Oak, Sabal Palms, and where possible, Royal Palms and Gumbo Limbo trees.

District and City staff have also been discussing options for future canal maintenance and continue to evaluate opportunities for the City to assume future management of the drainage canals east of I-95 and south of Yamato Road. Regardless of which entity is responsible for future maintenance of the drainage canals, it is necessary for the L-50 Canal to be remediated to ensure effective flood control. As such, the District is scheduled to commence canal rehabilitation work on the L-50 Canal in early November 2018.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s).

Field-staking was completed in July 2018 to delineate the L-50 canal northern right-of-way line within the project limits. Any plantings or vegetation, structures, fences or personal property

located and identified within the right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon possible so that this information can be properly reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

The project schedule is subject to change at any time due to weather conditions. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

James W. Fandrey, P.E.
