RICHARD E. & BEVERLY LARSON
2362 EDGEWATER DR
WEST PALM BEACH FL 33406 8714

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Initial Notification: Rehabilitation of Adjacent Drainage Canal
Project No 18-10166P.01; L-9 Canal (CCRP Project #1)**

Site Address: 2362 EDGEWATER DR WEST PALM BEACH FL 33406 8714

Dear RICHARD E. & BEVERLY LARSON:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>. Please review the project boundaries adjacent to your property. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by November 1, 2018. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early January 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, October 25, 2018 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by November 1, 2018. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early January 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, October 25, 2018 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

Dear CHARLENE G. HARRIS & HOWARD R. HARRIS II.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>. Please review the project boundaries adjacent to your property. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by November 1, 2018. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484.
