TIBURON I HOMEOWNERS ASSN INC RESIDENTIAL MANAGEMENT CONCEPTS INC C/O
20540 COUNTRY CLUB BLVD STE 101
BOCA RATON FL 33434 4206

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6967 TIBURON CIR BOCA RATON FL 33433

Dear TIBURON I HOMEOWNERS ASSN INC RESIDENTIAL MANAGEMENT CONCEPTS INC C/O:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first name "James" and last name "Fandrey" clearly legible.

Dear MARY E. MCLAUGHLIN :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.

Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first name "James" and last name "Fandrey" clearly legible.

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6744 TIBURON CIR BOCA RATON FL 33433

Dear WANDA S. PREITI :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first name "James" and last name "Fandrey" clearly legible.

BOCA RATON FL 33433 5453

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6582 CASABELLA LN BOCA RATON FL 33433

Dear CHRISTOPHER D. HARMON CHRISTOPHER D. HARMON TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

MARVIN D. WILSON JR. & JANET F. WILSON
6486 CASABELLA LN
BOCA RATON FL 33433 5437

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6486 CASABELLA LN BOCA RATON FL 33433

Dear MARVIN D. WILSON JR. & JANET F. WILSON:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

ROSALYN WARG & ROSALYN WARG TR.
6390 CASABELLA LN
BOCA RATON FL 33433 5435

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6390 CASABELLA LN BOCA RATON FL 33433

Dear ROSALYN WARG & ROSALYN WARG TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.

If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6022 PETALUMA DR BOCA RATON FL 33433

Dear CHARLES E. LYDAY :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

ADELE DACKEN & ADELE DACKEN TR.
6176 PETALUMA DR
HUNTINGTON STATION NY 11746 8018

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6110 PETALUMA DR BOCA RATON FL 33433

Dear ADELE DACKEN & ADELE DACKEN TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

CARL GOETZ JR. & JEAN GOETZ
6088 PETALUMA DR
WASHINGTON PA 15301 7224

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6198 PETALUMA DR BOCA RATON FL 33433

Dear CARL GOETZ JR. & JEAN GOETZ:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first name "James" and last name "Fandrey" being clearly legible.

Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at info@lwdd.net.

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first name "James" being more prominent.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: Rehabilitation of Adjacent Drainage Canal
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6823 CALLE DEL PAZ N

Dear WILLIAM J. WASKO JR. & JEAN A. WASKO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to info@lwdd.net or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.
