JENNIFER ORSENO & JOSEPHINE LAVINE  
6274 PETALUMA DR  
BOCA RATON FL 33433 5412

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: Rehabilitation of Adjacent Drainage Canal  
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6274 PETALUMA DR BOCA RATON FL 33433

Dear JENNIFER ORSENO & JOSEPHINE LAVINE:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.  
Assistant Director of Right-of-Way  
Lake Worth Drainage District

DONALD B. & MARY E. BARROWS  
6186 PETALUMA DR  
BOCA RATON FL 33433 5410

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: Rehabilitation of Adjacent Drainage Canal  
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6186 PETALUMA DR BOCA RATON FL 33433

Dear DONALD B. & MARY E. BARROWS:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.

**Subject: Rehabilitation of Adjacent Drainage Canal  
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6098 PETALUMA DR BOCA RATON FL 33433

Dear THERESA C. KEARNEY & MATTHEW B. KEARNEY TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: Rehabilitation of Adjacent Drainage Canal  
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 6010 PETALUMA DR BOCA RATON FL 33433

Dear RONALD J. & PHYLLIS L. HOEKZEMA:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

**Subject: Rehabilitation of Adjacent Drainage Canal  
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 5938 PATIO DR BOCA RATON FL 33433

Dear JASON & DYVONE C. CARTER:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

A handwritten signature in blue ink that reads "James W. Fandrey". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

**Subject: Rehabilitation of Adjacent Drainage Canal  
CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 5800 WIND DRIFT LN BOCA RATON FL 33433

Dear DOLORES I. & MARK VAN BOURGONDIEN:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.

CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 5688 WIND DRIFT LN BOCA RATON FL 33433

Dear PHYLLIS M. GREENBERG & PHYLLIS M. GREENBERG TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.

CCRP Project #2 (18-10166P.02); L-49 Canal**

Site Address: 5570 WIND DRIFT LN BOCA RATON FL 33433

Dear MAURO D. BINETTI & OSWALDO E. MONROY:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the drainage canal and associated right-of-way adjacent to your property. Rehabilitation of drainage canals in South Florida is necessary to facilitate effective flood control for public safety, and to proactively address potential flooding issues for surrounding neighborhoods.

**Attached is a map of the canal and associated project boundaries. Please review the project boundaries adjacent to your property. The District's canal rights-of-way are delineated by the red-dashed lines on the north and south sides of the canal channel. If there are any questions or concerns regarding the project boundaries or removal of vegetation/encroachments, please submit the attached request form to the District by January 10, 2019. Requests may be emailed to [info@lwdd.net](mailto:info@lwdd.net) or mailed to 13081 S. Military Trail, Delray Beach, FL 33484. For a more detailed view, the map is also available online at <http://www.lwdd.net/canal-maintenance/neighborhood>.**

Canal rehabilitation work is performed in phases and includes clearing encroachments from canal rights-of-way which may create obstructions to water flow and emergency access, as well as dredging the canal channel and reshaping the canal bank(s) as needed.

As an initial step, surveyors will stake the right-of-way to delineate project boundaries and identify encroachments. Field crews will then remove any non-native and hazardous vegetation located within the canal right-of-way. The District makes every effort to retain native trees where possible, such as Slash Pine, Live Oak, Sabal Palm and Pond Apple trees. Other encroachments which might hinder the ability to remove vegetation may also be removed at this time (e.g. stored materials or makeshift barriers).

Following removal of vegetation, property owners will be notified of any remaining structural encroachments which must be removed by the property owner from the right-of-way, such as fences, decking, and sheds.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, or equipment allocations, project site conditions, etc. Property owners are strongly encouraged to relocate or remove any plantings or vegetation, structures, fences or personal property prior to commencement of the project.

**The District is hosting a public meeting to share project specific information on Thursday, January 10, 2019 at 8:00 a.m. at District Headquarters, 13081 South Military Trail, Delray Beach.**

For more information and to view a short video on the District's Canal Rehabilitation Program, visit the District's website at <http://www.lwdd.net/canal-maintenance/canal-rehabilitation>.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-498-5363, extension 5580 or email at [info@lwdd.net](mailto:info@lwdd.net).

Thank you for your cooperation as we complete this important public safety project.

Sincerely,

James W. Fandrey, P.E.
