from ~2,700 LF west of Congress Avenue to Congress Avenue, and  
from Congress Avenue to Lake Osborne  
Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B**

Site Address: 3574 KEWANEE RD LAKE WORTH FL 33462

Dear PINNACLE LOOKING GLASS LLC:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). Site Address: 2920 NORWAY PINE LN LAKE WORTH FL 33462

Dear ALLY OLSSON & ALLY OLSSON TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). Dear JOHN R. & KATHLEEN REDON:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Site Address: 3314 PARADE PL LAKE WORTH FL 33462

Dear ADAM & ANDRIA BEACH:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. Dear DAMON CAPOZIO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

from ~2,700 LF west of Congress Avenue to Congress Avenue, and  
from Congress Avenue to Lake Osborne  
Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B**

Site Address: 3131 BUCCANEER RD LAKE WORTH FL 33462

Dear BRYAN S. HERBERS:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

ABRAHAM & AIDA L. BETANCES  
2955 NORTHSIDE DR  
LAKE WORTH FL 33462 3887

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: SECOND NOTIFICATION - Rehabilitation of the L-17 Canal  
from ~2,700 LF west of Congress Avenue to Congress Avenue, and  
from Congress Avenue to Lake Osborne  
Project Nos. 17-9947P.02 and 16-9947P.01; Job Nos. 073A and 073B**

Site Address: 2955 NORTHSIDE DR LAKE WORTH FL 33462

Dear ABRAHAM & AIDA L. BETANCES:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). Dear JOSEPH J. & ZELMA V. SPINAZZOLA:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). Site Address: 2673 NORTHSIDE DR LAKE WORTH FL 33462

Dear TOM J. MCCOY EST.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Dear DARYL GRIMM:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Site Address: 6529 EASTVIEW DR LAKE WORTH FL 33462

Dear ROBERT E. & PATRICIA A. EDDINS:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-17 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

To identify the boundaries of the District's L-17 Canal rights-of-way, both the north and south canal right-of-way lines within the limits of the project are scheduled to be re-staked by the District's Florida Licensed Surveyors beginning the week of January 14, 2019. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's revised canal rehabilitation schedule, we estimate the project will begin in mid-February 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.
