DAVID ALAN ROUSE & DAVID ALAN ROUSE TR.
1959 MEADOW CT
WEST PALM BEACH FL 33406 6749

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION - Rehabilitation of the L-8 Canal
from approximately 425 LF west of FL Mango Road to Lake Clarke
Project No. 18-9760P.09; Job No. 036B**

Site Address: 1959 MEADOW CT WEST PALM BEACH FL 33406

Dear DAVID ALAN ROUSE & DAVID ALAN ROUSE TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-8 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of February 4, 2019 to identify the boundaries of the District's L-8 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION - Rehabilitation of the L-8 Canal
from approximately 425 LF west of FL Mango Road to Lake Clarke
Project No. 18-9760P.09; Job No. 036B**

Site Address: 1825 GREGORY RD WEST PALM BEACH FL 33406

Dear PAMELA A. MARA :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-8 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of February 4, 2019 to identify the boundaries of the District's L-8 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

from approximately 425 LF west of FL Mango Road to Lake Clarke
Project No. 18-9760P.09; Job No. 036B**

Site Address: 7424 CLARKE RD LAKE CLARKE SHORES FL 33406

Dear JOANNA HOLLIS & JOANNA HOLLIS TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-8 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of February 4, 2019 to identify the boundaries of the District's L-8 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Project No. 18-9760P.09; Job No. 036B**

Site Address: 7557 NEMEC DR N WEST PALM BEACH FL 33406

Dear RONALD A. HAYNES & DENISHA T. CARTY:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-8 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of February 4, 2019 to identify the boundaries of the District's L-8 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

Dear DANIEL ANDREW HANLEY JR. & JIN LEE HANLEY:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-8 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of February 4, 2019 to identify the boundaries of the District's L-8 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early March 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

For additional information regarding this canal rehabilitation project, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.
