Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23466 LYONS RD 501 BOCA RATON FL 33428

Dear LUIS A. OQUENDO & MARGARITA DE JESUS OQUENDO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. Site Address: 23466 LYONS RD 509 BOCA RATON FL 33428

Dear ARSNT PROPERTY GROUP III LLC :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23145 BARWOOD PARK LN B BOCA RATON FL 33433

Dear AMMAR AL NOORI & NADA AHMED:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

BOCA RATON FL 33433 7906

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23128 BARWOOD PARK LN D BOCA RATON FL 33433

Dear KEN & IRENE KANASHIRO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

JOSEPH & NICOLENA MANFREDINI
24 OLIVE PL
LYNBROOK NY 11563 3339

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23423 SW 55TH AVE B BOCA RATON FL 33433

Dear JOSEPH & NICOLENA MANFREDINI:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23359 SW 55TH WAY F BOCA RATON FL 33433

Dear LINDA CRAFTS :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

Project No. 16-9976P.01; Job No. 183A**

Site Address: 23341 SW 55TH WAY F BOCA RATON FL 33433

Dear IGNAZIO & DENISE DIFATA:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

23133 SW 56TH AVE
BOCA RATON FL 33433 7941

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23133 SW 56TH AVE BOCA RATON FL 33433

Dear MARIA ACILEA M. RUSSELL & VOLNIER PAIXAO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 23037 SW 56TH AVE BOCA RATON FL 33433

Dear BARBARA A. TOMCZYK & BARBARA A. TOMCZYK TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 22833 SW 56TH AVE BOCA RATON FL 33433

Dear SONJA L. JAROSAK :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 22751 SW 56TH AVE BOCA RATON FL 33433

Dear KAREN G. LARATRO TRUST & DEBBY VIENS TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

**Subject: INITIAL NOTIFICATION CCRP#4
Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 22505 SW 56TH AVE BOCA RATON FL 33433

Dear MICHAEL SCHEUING :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.

Project No. 16-9976P.01

February 4, 2019

Page 2

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of project boundaries, please visit our website at www.lwdd.net and click on 'In Your Neighborhood' or email us at info@lwdd.net. If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580.

Sincerely,

Brian Tilles, P.E.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way please contact the District as soon as you can so that this information can be reviewed.

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in early April 2019. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

Rehabilitation of the E-1.5 Canal
From Hillsboro Canal to Lyons Road (via barge)
Project No. 16-9976P.01; Job No. 183A**

Site Address: 9106 SW 4TH ST BOCA RATON FL 33433

Dear GENE LEOFANTI JR. & GENE LEOFANTI JR. TR.:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the E-1.5 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal rights-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project are scheduled to be field-staked by the District's Florida Licensed Surveyors beginning the week of January 28, 2019 to identify the boundaries of the District's E-1.5 Canal rights-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

Please note, to share project-specific information with affected residents, the District may host an informational Open House Meeting from 8:00 AM to 9:00 AM on February 21, 2019 at District Headquarters located at 13081 South Military Trail, Delray Beach, Florida 33484. Meeting times and dates are subject to change. Prior to arrival, please confirm meeting time and date on the District's website LWDD.net.
