**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 87TH PL S, Boynton Beach, FL 33472**

Dear KEVIN P & JANET COSTELLO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

Please note, to share project-specific information with affected residents, the District will host an informational meeting from 9 AM to 10 AM on Wednesday, November 30. Please join the meeting from your computer, tablet or smartphone at <https://meet.goto.com/473260549>. You can also participate via phone by dialing +1 (646) 749-3122; Access Code: 473260549. Meeting times and dates are subject to change. Please confirm meeting time and date on the District's website [www.lwdd.net](http://www.lwdd.net).

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they may be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of the project boundaries, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or [ssherman@lwdd.net](mailto:ssherman@lwdd.net).

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9771 87TH PL S, Boynton Beach, FL 33472**

Dear ILIAD LLC :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

Project No. 16-9950P.01 Job #080

October 10, 2022

Page 2

Please note, to share project-specific information with affected residents, the District will host an informational meeting from 9 AM to 10 AM on Wednesday, November 30. Please join the meeting from your computer, tablet or smartphone at <https://meet.goto.com/473260549>. You can also participate via phone by dialing +1 (646) 749-3122; Access Code: 473260549. Meeting times and dates are subject to change. Please confirm meeting time and date on the District's website [www.lwdd.net](http://www.lwdd.net).

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they may be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of the project boundaries, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or [ssherman@lwdd.net](mailto:ssherman@lwdd.net).

ILIAD LLC  
5834 WINDSOR CT  
BOCA RATON, FL 33496

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9771 87TH PL S, Boynton Beach, FL 33472**

Dear ILIAD LLC :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

GREGORY W & CASSANDRA L ANDERSON  
9104 TALWAY CIR  
BOYNTON BEACH, FL 33472

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9104 TALWAY CIR, Boynton Beach, FL 33472**

Dear GREGORY W & CASSANDRA L ANDERSON:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

Project No. 16-9950P.01 Job #080

October 10, 2022

Please note, to share project-specific information with affected residents, the District will host an informational meeting from 9 AM to 10 AM on Wednesday, November 30. Please join the meeting from your computer, tablet or smartphone at <https://meet.goto.com/473260549>. You can also participate via phone by dialing +1 (646) 749-3122; Access Code: 473260549. Meeting times and dates are subject to change. Please confirm meeting time and date on the District's website [www.lwdd.net](http://www.lwdd.net).

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they may be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

SANDRA GOULD & SANDRA GOULD TR  
9200 TALWAY CIR  
BOYNTON BEACH, FL 33472

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9200 TALWAY CIR, Boynton Beach, FL 33472**

Dear SANDRA GOULD & SANDRA GOULD TR:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

Project No. 16-9950P.01 Job #080

October 10, 2022

Page 2

Please note, to share project-specific information with affected residents, the District will host an informational meeting from 9 AM to 10 AM on Wednesday, November 30. Please join the meeting from your computer, tablet or smartphone at <https://meet.goto.com/473260549>. You can also participate via phone by dialing +1 (646) 749-3122; Access Code: 473260549. Meeting times and dates are subject to change. Please confirm meeting time and date on the District's website [www.lwdd.net](http://www.lwdd.net).

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they may be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of the project boundaries, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or [ssherman@lwdd.net](mailto:ssherman@lwdd.net).

RANDALL J BURKE  
9272 TALWAY CIR  
BOYNTON BEACH, FL 33472

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9272 TALWAY CIR, Boynton Beach, FL 33472**

Dear RANDALL J BURKE :

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

Please note, to share project-specific information with affected residents, the District will host an informational meeting from 9 AM to 10 AM on Wednesday, November 30. Please join the meeting from your computer, tablet or smartphone at <https://meet.goto.com/473260549>. You can also participate via phone by dialing +1 (646) 749-3122; Access Code: 473260549. Meeting times and dates are subject to change. Please confirm meeting time and date on the District's website [www.lwdd.net](http://www.lwdd.net).

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they may be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.

To view additional information regarding this canal rehabilitation project including a map of the project boundaries, please visit our website at [www.lwdd.net](http://www.lwdd.net) and click on 'In Your Neighborhood' or email us at [info@lwdd.net](mailto:info@lwdd.net). HANAN ASSAYAG & BELLA GRUSHKO  
9284 TALWAY CIR  
BOYNTON BEACH, FL 33472

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9284 TALWAY CIR, Boynton Beach, FL 33472**

Dear HANAN ASSAYAG & BELLA GRUSHKO:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

9890 HINDEL CT  
BOYNTON BEACH, FL 33472

**DELIVERED VIA REGULAR MAIL AND HAND DELIVERY**

**Subject: L-21 Canal Rehabilitation from E-1 to Lyons Road**

**Site Address: 9890 HINDEL CT, Boynton Beach, FL 33472**

Dear MARK A & JEAN C LORENZEN:

The Lake Worth Drainage District (District) is planning necessary rehabilitation work on the L-21 Canal adjacent to your property. This work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts may include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of the canal bank(s). Encroachments located on the District's canal right-of-way can create obstructions to water flow during a heavy rainfall event or hinder the District's ability to properly maintain the canal, both of which can cause serious flooding issues for surrounding neighborhoods.

The limits of the project have been field-staked to identify the boundaries of the District's L-21 Canal right-of-way. Any plantings or vegetation, structures, fences or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. Please be advised that any encroachments remaining in the right-of-way at the commencement of the project may be removed and disposed of by the District.

If you have any prior written approvals, agreements, permits, or any other written authorization from the District for any existing encroachments, or any other information relative to any existing encroachment within the canal right-of-way, please contact the District as soon as you can so that this information can be reviewed.

Project No. 16-9950P.01 Job #080

October 10, 2022

Page 2

Please note, to share project-specific information with affected residents, the District will host an informational meeting from 9 AM to 10 AM on Wednesday, November 30. Please join the meeting from your computer, tablet or smartphone at <https://meet.goto.com/473260549>. You can also participate via phone by dialing +1 (646) 749-3122; Access Code: 473260549. Meeting times and dates are subject to change. Please confirm meeting time and date on the District's website [www.lwdd.net](http://www.lwdd.net).

Also, if you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they may be removed with this rehabilitation project. If any of these existing encroachments have previously been permitted by the District, you may apply for a permit to replace them; however, all current and applicable permit criteria must be met. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

Based on the District's current canal rehabilitation schedule, we estimate the project will begin in late - October 2022. The project schedule is subject to change at any time due to weather conditions, labor or equipment allocations, project site conditions, etc.
