KEVIN P & JANET COSTELLO
8289 BOYNTON BEACH BLVD
BOYNTON BEACH FL 33472 4413

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Dear KEVIN P & JANET COSTELLO:

**Subject: FINAL NOTICE - Canal Rehabilitation of L-21 Canal - E-1 Canal to Lyons Road & L-23 Canal - Acme Dairy Road to E-2W Canal
LWDD Project #'s 16-9950P.01 (Job #080) & 16-9953P.02 (Job #088)**

Site Address: 87TH PL S, BOYNTON BEACH, FL 33472

As a follow up to the previous notice mailed and hand delivered on October 11, 2022, please be advised that the Lake Worth Drainage District (District) is scheduled to commence necessary rehabilitation work on its L-21 and L-23 Canals on March 13, 2023.

The limits of the project have been staked by surveyors to identify the boundaries of the District's canal rights-of-way. Any plantings or vegetation, structures, fences, or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. **Please be advised that any vegetative encroachments remaining in the right-of-way at commencement of the project will be removed and disposed of by the District.**

Canal rehabilitation work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of eroding canal bank(s).

If you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or ssherman@lwdd.net.

Sincerely,

Brian Tilles, P.E.

Canal rehabilitation work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of eroding canal bank(s).

If you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or ssherman@lwdd.net.

Sincerely,

Brian Tilles, P.E.

LWDD Project #'s 16-9950P.01 (Job #080) & 16-9953P.02 (Job #088)**

Site Address: 8490 S MIZZEN DR, BOYNTON BEACH, FL 33472

As a follow up to the previous notice mailed and hand delivered on October 11, 2022, please be advised that the Lake Worth Drainage District (District) is scheduled to commence necessary rehabilitation work on its L-21 and L-23 Canals on March 13, 2023.

The limits of the project have been staked by surveyors to identify the boundaries of the District's canal rights-of-way. Any plantings or vegetation, structures, fences, or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. **Please be advised that any vegetative encroachments remaining in the right-of-way at commencement of the project will be removed and disposed of by the District.**

Canal rehabilitation work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of eroding canal bank(s).

If you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or ssherman@lwdd.net.

Sincerely,

Brian Tilles, P.E.

MARK A & JEAN C LORENZEN
9890 HINDEL CT
BOYNTON BEACH FL 33472 2730

DELIVERED VIA REGULAR MAIL AND HAND DELIVERY

Dear MARK A & JEAN C LORENZEN:

**Subject: FINAL NOTICE - Canal Rehabilitation of L-21 Canal - E-1 Canal to Lyons Road & L-23 Canal - Acme Dairy Road to E-2W Canal
LWDD Project #'s 16-9950P.01 (Job #080) & 16-9953P.02 (Job #088)**

Site Address: 9890 HINDEL CT, BOYNTON BEACH, FL 33472

As a follow up to the previous notice mailed and hand delivered on October 11, 2022, please be advised that the Lake Worth Drainage District (District) is scheduled to commence necessary rehabilitation work on its L-21 and L-23 Canals on March 13, 2023.

The limits of the project have been staked by surveyors to identify the boundaries of the District's canal rights-of-way. Any plantings or vegetation, structures, fences, or personal property located and identified within this right-of-way are encroachments and should be removed by the property owner prior to the commencement of this project. **Please be advised that any vegetative encroachments remaining in the right-of-way at commencement of the project will be removed and disposed of by the District.**

Canal rehabilitation work is necessary to facilitate effective flood control for public safety and provide unobstructed access for emergency flood control response and routine canal maintenance. Rehabilitation efforts include removal of vegetative encroachments, removal of structural and non-structural encroachments, dredging of the canal channel, and reshaping or reconstruction of eroding canal bank(s).

If you have constructed or installed any fencing, plantings or vegetation, or any other items within the canal right-of-way of which you are relying on for security purposes, please be advised these are considered encroachments and they will be removed with this rehabilitation project. If you wish to secure your private property, you must do so outside the limits of the canal right-of-way.

If you would like to speak with a representative regarding this specific project, please contact Steve Sherman, Right-of-Way Compliance Coordinator, at 561-819-5580 or ssherman@lwdd.net.

Sincerely,

Brian Tilles, P.E.
